

EMERGENCY RESPONSE PROGRAM

When environmental disaster strikes Pace® is ready to help 24/7/365

Emergency Testing and Analytical Support

- Train Derailments
- Pipeline Ruptures
- Oil Spills
- Natural Disasters
- Major Fires
- Industrial Chemical Spills or Leaks

**PACE® EMERGENCY RESPONSE HOTLINE:
877.859.7778**

When disaster strikes and materials of concern are released into the environment, Pace® Emergency Response Team offers unmatched 24/7/365 response coverage across the United States with extensive resources from over one hundred laboratory locations.

From small, contained spills to significant incidents Pace® has the expertise and ability to deliver complete and secure testing solutions. From initial response, sample and material management, data use evaluation, and specialty analytical services, our Pace® Emergency Response Team responders are available 24/7.

We ensure that sample containers are available, samples are collected appropriately, critical samples are expedited, and rapid results are provided to decision-makers on the scene. This level of lab support is crucial in making decisions that impact the safety of emergency personnel on-site and residents' potential exposure to hazardous chemicals.

CAPABILITIES

- Immediate technical support for planning and logistics coordination 24/7/365
- A national network of laboratories and responders
- Rapid laboratory results to support tactical decisions
 - Establishment of emergency supply storage sites where available to hold emergency sampling kits for primary analytical requirements allows for the immediate collection of material to document the initial stages of the action in the event of an incident.
- Quality data ensures defensible results
- Automated, on-line, easy-to-use data management tools
- On-site options
 - Capability within 24 hours to set up an onsite Sample Management Office (SMO)
- Readiness kits that include general bottleware and COCs to support immediate ability to respond and sample
- Bottle kits to support emergency preparedness plans

Time is key. Rapid deployment of the right resources means faster mobilization times and more efficient responses.

With one call to Pace® at 1.877.859.7778 you are connected to environmental professionals technically trained in emergency response situations.
