

MICROBIOLOGY

Pace® Life Sciences Provides Microbiology Testing Services to the Pharmaceutical, Biopharmaceutical, and Medical Device Industries.

Pace® Life Sciences has expertise in testing the most complex dosage forms, including parenteral, inhalation drug delivery, aerosols, transdermal delivery systems, creams/ointments, tablets and capsules, medical devices and device/drug combination products. Testing is performed in compliance with current USP/ NF, EP, JP and client-supplied methodology. Custom protocols can be created to support product development, investigations, and unique testing needs.

PHARMACEUTICALS / BIOPHARMACEUTICALS

- Microbial Limits
- Sterility Test
- Bacterial Endotoxin
- Particulate Testing
- Antimicrobial Efficacy Test

MEDICAL DEVICES

- Microbial Bioburden
- Test of Sterility
- Biological Indicators
- Bacterial Endotoxins
- Sterilization Validation Support
- Package Integrity / Ingress Testing

FACILITY ENVIRONMENTAL MONITORING SERVICES

- Cleanrooms & Controlled Environments
- Water Systems Monitoring
- Compressed Air / Compressed Gas Systems
- Cleaning Verification
- Disinfectant Efficacy
- On-Site Sampling
- Identification of Organisms
