

HANDLED WITH CARE

BIOMEDICAL INSTITUTE RELOCATION

CHALLENGE

A leading biomedical Institute was faced with the herculean task of moving 40 years of research, along with a significant amount of highly specialized equipment. The lab's work with highly infectious diseases, as well as a tight timeframe for the move, supplied additional layers of difficulty to the endeavor. With just one month to accomplish the move, the lab needed a partner they could trust; and they needed one fast.

RESPONSE

- Set up site visit to get the full scope of the project.
- Assign a dedicated project manager to partner with the lab on a customized move plan.
- Deploy a team of relocation specialists to execute the move.
- Develop dynamic plans for outsourced items as needed.

RESULT

Pace® relocation professionals managing all aspects of the move gave the client confidence, throughout the process, that their decades of research was in capable hands. Pace® exceeded client expectations and delivered a streamlined, successful relocation of all laboratory equipment and samples.
