

USP <797> Compliance Kits

The 2023 revisions to USP <797> increase sampling frequency to better safeguard the safety and sterility of Compounded Sterile Preparations (CSPs). To help ensure you have all the materials you need to maintain compliance, Pace® offers USP <797> Compliance Kit subscriptions. Kits are customizable and delivered on your schedule.

Compliance kits are available in three sizes and include either standard or irradiated plates:

Basic: 1 pack of TSA and 1 pack of SabDex contact plates

Medium: 2 packs of TSA and 2 packs of SabDex contact plates

Complex: 3 packs of TSA and 3 packs of SabDex contact plates

Compliance kits include the following components:

- Whirl-paks for repackaging
- Strips of parafilm
- Ice packs
- Return shipping label
- Custom chain of custody, sampling map if provided
- Sampling instruction sheet
- Soft sided cooler
- Optional: TSA petri plates for glove fingertip sampling
- Optional: Sterile gloves

Pace® USP <797> Compliance Kits are offered through Aerobiology, part of the Pace® network of labs and a leader in providing environmental monitoring services for USP <797> compliance.
